

27th Annual Alberta Biomedical Engineering Conference

October 30-November 1, 2026

Lightning Presentation Guidelines

When preparing your presentation, consider the following guidelines:

- Be creative!
- Make use of images, graphs, figures, and tables where possible to avoid lengthy text
- Ensure slides are easy to read by making text large and with good contrast to the background
- Aim to summarize project results through the lightning presentation and present all important points using the paired poster
- Reduce the use of jargon, explain all acronyms, and provide enough detail without losing your audience
- Highlight the most important findings to make a lasting impact

IMPORTANT

- Lightning presentations will be no longer than 3 minutes with no time for questions following the presentation.
- Lightning talks are paired with a poster presented during a poster session.
- Presentations consist of a title slide and a single results / data slide.
- The title slide may include a project title, authors, and/or acknowledgements. Results, data, conclusions, or interpretations may not be included.
- Paired posters must follow general poster guidelines; please refer to the poster guidelines document for more information.
- Presentation time slots will be distributed closer to the conference.
- All presentations must be in PowerPoint.
- File name must be LASTNAME_FIRSTNAME_2026.pptx
- Slides must be emailed to abbmeconference@ucalgary.ca a minimum of 2 days before the conference (October 28th) at 9:00 am.
